## Math Scavenger Hunt

**Directions:** Where in the world do we use math?  
Everywhere!!

You must find **15** of the **30** items listed below. Write the item description on the sheet of notebook paper. You will need to *list the source* (Ex. Effingham Herald or Better Homes and Garden) for each item.

Items can be found from newspapers or magazines. Make sure you list your source for each item!

You will then cut out the picture from the newspaper or magazine that goes along with the item. You will label it with the item number to create a collage of math from the real world! Be creative and have fun!

☺

- |                                   |  |
|-----------------------------------|--|
