Are you going to read about fast and slow extreme sports, what extreme sports do you know? Mention some of them.

Now, read the article and fill in the activities from the next page.

### Extreme Sports

Snowboarding is an exciting and sometimes dangerous sport. Some people like it more than skiing because you can go faster and you can go in between the trees on your snowboard. It is important to wear a helmet to protect your head, and also to wear warm clothes. Wearing a helmet can prevent you from getting hurt, or even die having an accident while practicing this sport. It is absolutely necessary to wear one every time you go snowboarding.
