next

Find the inverse of the function:

$$y = (x+8)^3 + 7$$

Correct!

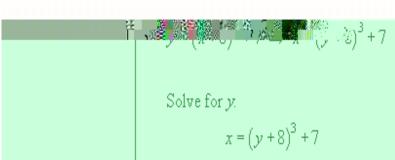

You said C:

$$y = \sqrt[3]{x - 7} - 8$$

The correct answer is C:

$$y = \sqrt[3]{x - 7} - 8$$

Correct answer explana

$$x - (y + 8)^{-1}$$

 $x - 7 = (y + 8)^{3}$

$$y + 8 = \sqrt[3]{x - 7}$$

$$y = \sqrt[3]{x - 7} - 8$$
