

Place Value

(Day #1)

Mrs. Ramiro is the Lunchroom Supply Manager for the city of Lawton, Oklahoma. She orders lunchroom supplies on a monthly basis. In September, the following number of students ate in each lunchroom:

<u>School</u>	<u># of Students</u>
Martin Elementary	12,978
Louis Elementary	17,576
Melville High	103,876
Raymond High	118,213

- A.** Which school's number of students has a 7 in the thousand's place and in the ten's place?
- B.** If Mrs. Ramiro orders napkins by rounding the number of students to the nearest hundreds, for which school did she order 13,000 napkins?
- C.** If Raymond High School had 10,000 more students last year, how many students attended the school last year?
- D.** Write the number of students that ate lunch at Louis Elementary School last month in expanded form.
