

TEST 1 (2019-2020)

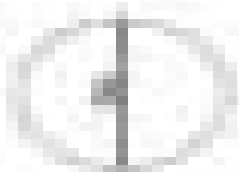

QUESTION 1

Figure 1 shows a cross-section of a river channel. The river is flowing from left to right. The water level is indicated by the dashed line. The river bed is indicated by the solid line. The river is flowing in a straight channel.

The diagram shows a cross-section of a river channel. The water level is indicated by a dashed line, and the river bed is indicated by a solid line. The river is flowing from left to right. The channel is straight.
