

Art principle worksheet

Name _____

1: Balance

Balance is the visual weight in an artwork. You know an artwork is balanced when a single section does not over dominate the rest. If you cut an artwork up into sections, each section should have something going on in it. Symmetrical balance is when the same amount of things are on one side of the art work as the other side. Asymmetrical balance is when two sides of an artwork are different, but seem visually balanced because of such things as color and shapes.

Title of artwork:
Name of artist:
Date artwork done:
Medium used:

2: Unity

Unity is done by the artist when an artwork looks as though everything in or on it belongs together. Unity can be shown by using the same color throughout an artwork or by using the same technique throughout the artwork. It can also be shown by using the same shapes or patterns throughout an artwork.

Title of artwork:
