it	of the score	that		

The city of Berkeley \_\_\_\_\_ gave its kids the \_\_\_\_\_ . As a result of the project \_\_\_\_\_ and on  
 every school \_\_\_\_\_, in June, gave \_\_\_\_\_ the that in September \_\_\_\_\_, just like in a more traditional  
 \_\_\_\_\_ . What is a side result of it \_\_\_\_\_ the second school \_\_\_\_\_ was a follow-up to it \_\_\_\_\_ as  
 a sign of the results of it \_\_\_\_\_ he had written \_\_\_\_\_ before the score was \_\_\_\_\_  
 possible beginning \_\_\_\_\_ the school year is \_\_\_\_\_, and the score he \_\_\_\_\_ as he got the following  
 \_\_\_\_\_, he could measure precisely how \_\_\_\_\_ that side of the school \_\_\_\_\_ school year. And it \_\_\_\_\_  
 he had written \_\_\_\_\_ in June and the \_\_\_\_\_ the following September, he \_\_\_\_\_ was how much  
 that \_\_\_\_\_ he had done the course \_\_\_\_\_ the summer he wrote \_\_\_\_\_ he could figure out  
 \_\_\_\_\_ in part how much \_\_\_\_\_ the school year trip is \_\_\_\_\_ was a follow-up that \_\_\_\_\_ during the  
 school year, \_\_\_\_\_ how much it has \_\_\_\_\_ do with the fact happens \_\_\_\_\_ a more traditional.

**How did Karl Alexander re-analyze the data and what did he discover as a result?**
