

## **ACADEMIC FAILURE**

### **What's Behind the Drop and Rise of the Achievement Gap?**

Education leaders have to be realistic. How to raise the scores of students who are struggling is a challenge. It's not about just adding more resources. There are many reasons why students are struggling. It's not about just adding more resources. There are many reasons why students are struggling. It's not about just adding more resources. There are many reasons why students are struggling.

The government has spent a lot of money on education. But the achievement gap is still there. Why? It's not about just adding more resources. There are many reasons why students are struggling. It's not about just adding more resources. There are many reasons why students are struggling.

The achievement gap is caused by many factors. It's not about just adding more resources. There are many reasons why students are struggling. It's not about just adding more resources. There are many reasons why students are struggling.

But there are things we can do to help. It's not about just adding more resources. There are many reasons why students are struggling. It's not about just adding more resources. There are many reasons why students are struggling.
