

**Form:** a 3D figure that occupies actual space (real or implied).

With a piece of scrap paper, create a real form and affix it in the square provided below. Have fun with this and create a unique form.

Draw the same form in a simple environment (it could be in the hot desert, a misty room, etc.). Make sure you put more effort into making your implied form look 3D.

**Color:** the light that is reflected back to the eye

Complementary- color pairs that are opposite on the color wheel

Monochromatic - only one color (but can be many different shades)

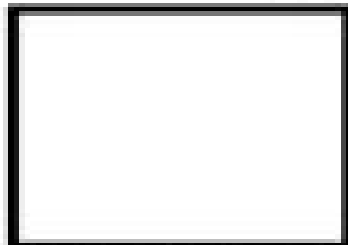

Analogous - colors that are neighbors on the color wheel

Warm - red, orange, yellow and all shades in between

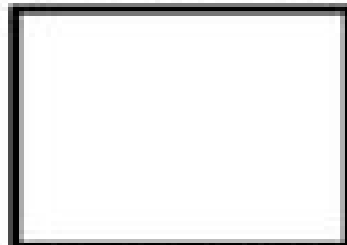

Cool - green, blue, purple and all shades in between

Neutral - grays and browns

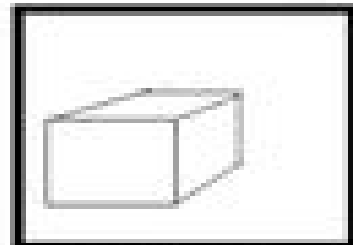

\*Black is all colors together, white is the absence of color

Draw a person wearing warm colors.  
Color in the background using neutrals.

Draw a landscape using Analogous Colors.

Create a light source.

Color in the color using a Monochromatic Scheme.  
Color in the background using the complement  
of the monochromatic color you chose.
