

## Can you spot the best paragraph?

Draw a line through unrelated information. Put a star next to related information.

My favorite subject is Math. Math starts at 8:00 am in my class and then we have Art. Math has four letters in its name but it teaches you how to use numbers. I love multiplication but I get confused with subtraction. Is that normal? I should ask my mom who created Math and if I can go to soccer practice on Saturday. Math is awesome!

My favorite subject is Science. In Science, you learn about the world. Sometimes, you get answers in Science to explain things about the weather, space, or even rocks. I usually go to basketball practice after I finish my Science homework. Then, I eat a sweet bowl of ice cream. I have a huge Science book collection and I have learned so much from reading them.
