

Moving things

Observations

Living things can move by themselves. Things that are not alive move in different ways. Some things fall; some things roll; some things fly; some things slide; some things bounce; and some things pour.

Science activity

Draw a line joining each picture to the word that describes how it is moving.

slide

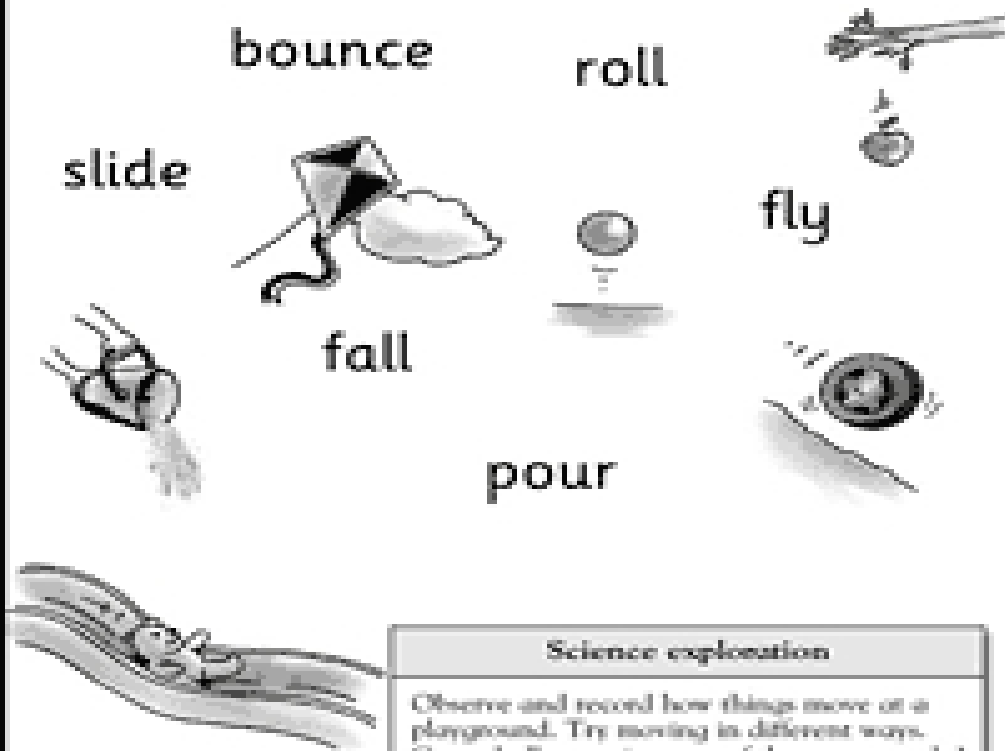

bounce

roll

fly

fall

pour

Science exploration

Observe and record how things move at a playground. Try moving in different ways. Can a ball move in some of the ways you do?
