

Writing practice (continued)

Name _____ Date _____

Background notes

There is a widespread belief that people are "creative" and "talented" in themselves, rather than that they are made creative through the activities in which they engage. In other words, some are "born creative" and others are not. This is a very old idea, but it is still popular.

But there are good reasons to doubt this idea. First, the fact that some people are more creative than others is not a matter of degree. It is a matter of kind. Some people are "born creative" and others are not. This is a very old idea, but it is still popular. They are not "born creative" and others are not. This is a very old idea, but it is still popular. They are not "born creative" and others are not. This is a very old idea, but it is still popular.

Second, many of the people who are most creative are not "born creative" and others are not. They are not "born creative" and others are not. They are not "born creative" and others are not. They are not "born creative" and others are not. They are not "born creative" and others are not. They are not "born creative" and others are not.

Finally, many of the people who are most creative are not "born creative" and others are not. They are not "born creative" and others are not. They are not "born creative" and others are not. They are not "born creative" and others are not. They are not "born creative" and others are not. They are not "born creative" and others are not.

It is important to understand that the idea of "born creative" and "talented" is a very old idea, but it is still popular. It is a very old idea, but it is still popular. It is a very old idea, but it is still popular. It is a very old idea, but it is still popular. It is a very old idea, but it is still popular.

Answer and justify your answers.
