

Directions: Organize the data from the following problem, then, graph the data into the line plot. Finally, answer the questions.

Saturday, my dad and I went fishing at Lake Mead. We arrived to the lake at 8 A.M. Each hour, we counted the number of fish we caught. Dad caught 4 fish by 9 A.M. and I had caught 2. Between 9 A.M. and 10 A.M. we each caught 3 fish. By 11 A.M. Dad had a total of 12 fish and I had a total of 7 fish. During the last hour, Dad was able to hook 5 more fish. I grabbed 6 in the last hour!

Time of Fish Count	9 A.M.	10 A.M.	11 A.M.	12 P.M.	Total Fish
Dad					
Me					

- How many total fish did Dad catch? _____
- How many total fish were caught in all? _____
- At what hour was the most fish caught? _____
- At what hour did I catch more than Dad? _____
