

# Fast and slow motion

## Observations

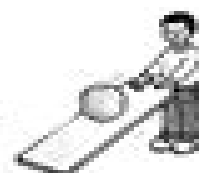

Pushes and pulls are forces that can make things move faster or slower. Pushes and pulls can also make things stop moving.

## Science activity

Answer the questions about making things move faster or slower.

How can Jason make the ball roll slower?

\_\_\_\_\_

How can Amy make the ball move faster?

\_\_\_\_\_

How can Luke make the bike go slower?

\_\_\_\_\_

How can Anna make the ball move faster?

\_\_\_\_\_

## Science exploration

Design and conduct an experiment to see how you can make a marble move quickly and slowly through a cardboard tube.
