Tools of the Trade

Cut apart the tools below.
Glue each tool below the description
of its job.

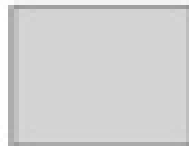

1. Dr. Skyler protects his eyes when he works in the lab. Which tool does he use?

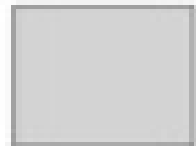

2. Dr. Skyler uses many tools to measure things. Which tool measures length?

3. Sometimes Dr. Skyler needs to compare the weights of two things. Which tool does he need?

4. Dr. Skyler looks at some things that are very tiny. He looks through the small lens on this tool.

5. At other times, when he wants to look at something larger, he may use this tool, which he can hold in his hand.

6. When he wants to know how hot or cold something is, Dr. Skyler needs another tool. Which tool measures temperature?

safety goggles
