

Functions as Inputs and Outputs : Step by Step Lesson

Lesson 1: Functions Problems:

1. Complete the table:

$f(x)$ is 100	
x	$f(x)$
100	1
10	1
1	1
1	1

Explanation:

When first we make an input table as:

a) Evaluate $f(x)$ in the list as 100

$f(x)$ is 100

$f(x)$ is 100-10 = 90 as 10 in the table

$f(x)$ is 100

Therefore as, the $f(x)$ is 100.

Complete the first row of the table.
