

GOALS WORKSHEET

Write a goal that you want to achieve.	How much money do you still need to reach this goal?	How many months from now do you want this goal achieved?	This is how much you should save each month for this goal.

If you can't fund all of your goals, then decide which goals to prioritize.
Focus on saving toward your most urgent or important goals.
When you meet a goal, start saving toward your next important goals.
