Basic Algebra (2)

Solve for x.

$4x - 85 = 11$	$20x = 40$	$18x - 79 = -97$
$-12x + 59 = 47$	$11x - 91 = 30$	$20x + 41 = -79$
$-20x + 97 = -3$	$-8x + 93 = 37$	$-13x + 34 = -5$
$17x = 17$	$-3x + 30 = -42$	$-9x = 81$
$15x = 75$	$11x + 79 = -53$	$18x - 11 = 7$
$8x + 85 = 13$	$-6x + 16 = -8$	$8x = 16$
$10x - 39 = 41$	$-14x + 9 = -75$	$-17x = -17$
$20x = 80$	$-2x = -44$	$-17x = 34$
$-3x = -12$	$-16x = -48$	$-5x + 40 = 0$
