

1. Solve for y_2 : $d = y_2 - y_1$
 $-y_2 - y_2$

$$-d - y_2 = -y_1$$

$$y_2 = -d - y_1$$

2. Solve for b : $a = b + c$
 $-b - b$

$$-b + a = c$$

$$-a - a$$

$$b = c - a$$
