

Name: _____

CCSS 2.MD.1 Measure the length of an objectprimer

Measurement

Directions: About how many blocks long is each ice cream cone?

The image shows three ice cream cones of different heights. Each cone is positioned to the left of a vertical bar divided into 10 equal rectangular blocks. The top block of each bar is shaded gray. The first cone is the shortest, the second is medium, and the third is the tallest. Below each bar is a horizontal line for writing the measurement.
