

## Assembling Directions

### Materials Needed:

• Final Draft	• Pencil or Pen
• Final Draft Templates	• Color Pencils/Markers
• Evaluation Rubric	• Scissors, Glue, and Tape

1. Using your edited Final Draft complete the writing sections in your *Stellaluna* templates.
2. Cut out the body template along the solid lines and the wing templates along the solid and dotted black lines.
3. On the left wing place glue on the dotted line section and glue this wing on the left side of the cat's body. Glue the left wing slightly below the cat's left ear (see the example below).
4. On the right wing place glue on the dotted line section and glue this wing on the right side of the cat's body. Glue the right wing slightly below the left wing (see the example below).
5. Color all of the sections of your *Stellaluna* templates.
6. Now turn your *Stellaluna* project over and tape these sections together securely so that they will not fall apart.
