Grams, Moles and Molecular Mass Worksheet

Reference: Tom Stretton Chemistry

- 1. What is the mass of 0.100 mol of each of the substances given below:
 - (a) Sodium carbonate, Na₂CO₃
 - (b) Ammonium tetraborate, (NH₄)₂B₄O₇
 - (c) Calcium cyclamate, Ca(C₆H₁₂NSO₃)₂
- How many moles of sodium nitrate are in 1.70 grams of sodium nitrate, NaNO₃, a substance used in fertilizers and to make gunpowder.
- Ammonium sulphate, (NH₄)₂SO₄, is a fertilizer used to supply both nitrogen and sulphur. How many grams of ammonium sulphate are in 35.8 moles of (NH₄)₂SO₄.
- 4. A 0.500 mol sample of table sugar, $C_{12}H_{22}O_{11}$, weighs how many grams?
- 5. A solution of zinc chloride, ZnCl₂, in water is used to soak the ends of wooden fenceposts to preserve them from rotting while they are stuck in the ground. One ratio used is 840 grams ZnCl₂ to 4 L water. How many moles of ZnCl₂ are in 840 grams of ZnCl₂?
- 6. In the early 1970s, thallium sulphate, Tl_2SO_4 , a powerful poison, was illegally used in poison baits to control predators such as coyotes on western rangelands. Hundreds of eagles died after taking these baits. A 1.00 kilogram can of Tl_2SO_4 contains how many moles of this compound?
- 7. Borazon, one crystalline form of boron nitride, BN, is very likely the hardest of all substances. If one sample contains 3.02 X 10²³ atoms of boron, how many atoms and how many grams of nitrogen are also in this sample?
- 8. If iodine is not in a person's diet, a thyroid condition called goitre develops. Iodized salt is all that it takes to prevent this disfiguring condition. Calcium iodate, Ca(IO₃)₂, is added to table salt to make iodized salt. How many atoms of iodine are in 0.500 moles of Ca(IO₃)₂? How many grams of calcium iodate are needed to supply this much iodine?
- 9. Ammonium carbonate,(NH₄)₂CO₃, is used as a fertilizer and to manufacture explosives. How many atoms of nitrogen are in 0.665 moles of this substance? How many grams of ammonium nitrate supply this much nitrogen?
- 10. Sodium perborate, NaBO₃, is present in "oxygen bleach". It acts by releasing oxygen, which has bleaching ability. How many grams of sodium perborate are in 4.65 moles of NaBO₃?
- 11. Barium sulphate, BaSO₄, is given to patients as a thick slurry in flavoured water before X-rays are taken of the intestinal tract. The barium blocks the X-rays, and the tract therefore casts a shadow that is seen on the x-ray film. How many grams are in 0.568 mole of barium
