Name				

- 1. Who created the first system of classification and identification?
- List 5 examples of measurements used for this system of identification. (case studies)
- What is the significance of the Will West case? (case studies)
- Who developed the fingerprint classification system that is used in the United States?
- What type of characteristic is a fingerprint? (individual or class?)
- What is the purpose of skin ridges?
- What is another name for a dermal ridge?
- Where on the human body are these ridges located?
- When a person touches something, he/she leaves behind a fingerprint. What does this impression consist of?
- 10. Anatomy of a Fingerprint:
  - a. What is the outer layer of the skin called?
  - b. What is the inner layer of the skin called?
  - Which part of the skin actually causes the ridge patterns of a fingerprint?
  - d. Which structure in the skin produces the materials that leave fingerprints?
  - e. Where does the oil that is deposited with fingerprints come from?
- 11. When are a person's fingerprints formed?
- 12. Can fingerprints be permanently destroyed?
- 13. What are the three main patterns of prints, and how common (%) is each?
- 14. Be able to identify:
  - a. Radial loop
  - b. Ulnar loop

  - c. Plain whorld. Central pocket whorl
- e. Double loop whorl
- f. Accidental whorl
- Plain arch
- h. Tented arch

- 15. What is a core?
- 16. What is a delta?
- 17. Define ridge count.
- 18. Do identical twins have the same fingerprints?
- 19. What is the term for the small details that result in unique ridge patterns?
- 20. How many individual ridge characteristics are contained on the average fingerprint?
- 21. How many matching characteristics are needed for a case in court?
- 22. Be able to identify these minutiae:
  - a. Bifurcation
  - b. Ridge ending Lake or enclosure
  - d. Dot or island

- Independent ridge
- Spur f.
- g. Bridge or crossover
- 23. What is the name of the automated system that the FBI and other agencies use to match fingerprints? Does it make the final match?
- 24. Define the three types of fingerprints left at crime scenes? Give examples of each.
  - a. Latent
  - b. Visible
  - c. Plastic
- 25. REMEMBER USE THE L.A.W. and Beyond the Pattern Worksheet! Anything on it is fair game for the test!
