Study guide

Rockin' With the Rock Cycle

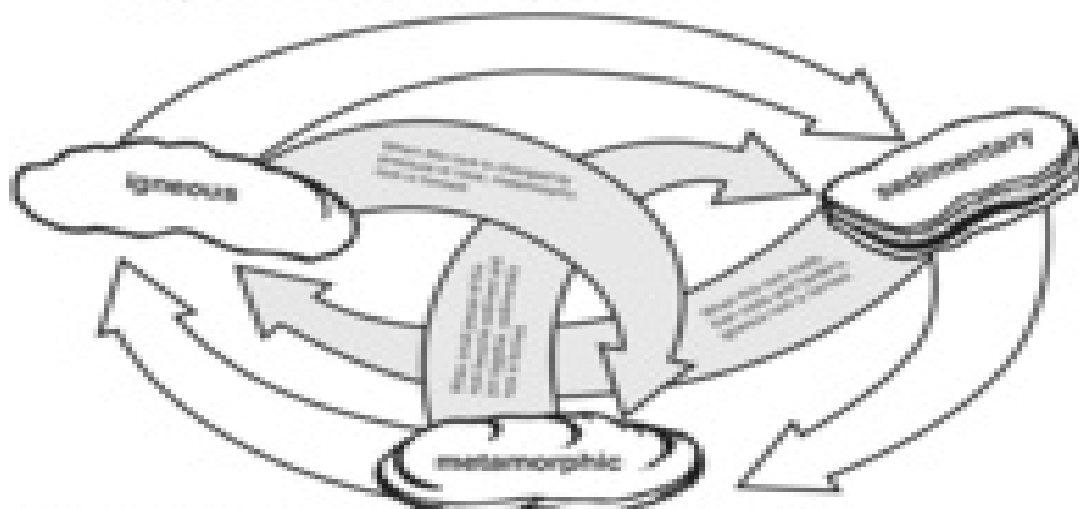

Use a word from the rock pile to complete each sentence.

1. _____ rock forms when melted rock cools and then hardens.
2. _____ rock forms when layers of sediment bond together.
3. _____ rock forms when pressure or heat changes rock.

Complete the rock cycle.

1. Write each of the following sentences in the correct outer arrow:
 - Layers of sediment join together.
 - Melted rock cools and hardens.
 - Changes are made by heat and pressure.

2. Lightly color the outer arrow pointing to igneous rock red.
3. Lightly color the outer arrow pointing to sedimentary rock blue.
4. Lightly color the outer arrow pointing to metamorphic rock brown.
