

Lesson 1

We can write thinking about operations as attaching the happens to the numbers.

12 + 3 means

1	2	+	3	=	

11 x 2 means

1	1	x	2	=	

You can also think of operations as an action that you happen to any number. In this case, it is called a function.

2 + 3 means

2	+	3	=	

In the case of a function, it is easier to think about the operation being attached to the number what follows. This is so if the function involves with numbers going into the number and answer empty out. The number going in and the number coming out are called an input and output because they happen in a specific order.

12 + 3 means

1	2	+	3	=	

11 x 2 means

1	1	x	2	=	

2 + 3 means

2	+	3	=	

12 + 3 means

1	2	+	3	=	

11 x 2 means

1	1	x	2	=	

2 + 3 means

2	+	3	=	

12 + 3 means

1	2	+	3	=	

11 x 2 means

1	1	x	2	=	

2 + 3 means

2	+	3	=	

12 + 3 means

1	2	+	3	=	

11 x 2 means

1	1	x	2	=	

2 + 3 means

2	+	3	=	

Make a your own function: _____

It is the order to your function:

1	2
