

**TABLE NUMBERING AND SYSTEM NUMBERING**  
**RECOMMENDED APPROACH**

Place the number(s) following the **subscripted reference** number to correspond with exactly one object being used (point to the table NUMBERED APPROXIMATELY) and underline the number **once** if it is **in**. Complete the identification through **the** sentence if it goes with another **or** **the** if it goes with **the**.

**10 PRINCIPLES FOR THE DESIGN TABLE**

When using text, use simple, structured, and consistent style. Provide text to the appropriate level of detail when needed, and avoid using too much text when not needed. Use the following guidelines to help you design your table.

1. **Use a clear, consistent style.** Use a consistent style for all text in the table. Use a consistent style for all text in the table. Use a consistent style for all text in the table.

2. **Use a consistent style.** Use a consistent style for all text in the table. Use a consistent style for all text in the table. Use a consistent style for all text in the table.

3. **Use a consistent style.** Use a consistent style for all text in the table. Use a consistent style for all text in the table. Use a consistent style for all text in the table.

4. **Use a consistent style.** Use a consistent style for all text in the table. Use a consistent style for all text in the table. Use a consistent style for all text in the table.

5. **Use a consistent style.** Use a consistent style for all text in the table. Use a consistent style for all text in the table. Use a consistent style for all text in the table.

6. **Use a consistent style.** Use a consistent style for all text in the table. Use a consistent style for all text in the table. Use a consistent style for all text in the table.

7. **Use a consistent style.** Use a consistent style for all text in the table. Use a consistent style for all text in the table. Use a consistent style for all text in the table.

8. **Use a consistent style.** Use a consistent style for all text in the table. Use a consistent style for all text in the table. Use a consistent style for all text in the table.

9. **Use a consistent style.** Use a consistent style for all text in the table. Use a consistent style for all text in the table. Use a consistent style for all text in the table.

10. **Use a consistent style.** Use a consistent style for all text in the table. Use a consistent style for all text in the table. Use a consistent style for all text in the table.

1. Consider the overall layout of the table and the number of columns and rows. Consider the overall layout of the table and the number of columns and rows.
