

Family bears

The bear mom is taking care her babies' bears in the woods. She looks like they play with the little squirrel. However, she calls Benny, the smallest her bears. She sees that he is away from his brothers

The baby bear followed his mom. Mom bear walked through the woods. She was looking for berries to eat. She found some black berries. She started eating them. The babies started eating them, too. They

ate all the berries. Baby bear was full. Mom bear was still hungry.

She started walking again. She wanted to find more berries to eat. Baby bear lay down. He was full. He wanted to take a nap. But mom bear came back. She growled at baby bear. He understood mom's growl.

When mom growled, he obeyed. He got up and followed his mum. After, she sleeps on the grass, near her small baby, while the other bears are looking for honey and berries to eat more.

Someday he would take a nap after a meal. A squirrel ran up a tree with a nut.

It dropped the nut and ran back down to the ground. It picked up the nut so Benny dislikes the nuts, he likes honey.
