

Name: _____

Land Conservation

Directions: Our land is precious. It grows our food and the trees that supply our oxygen. We live on our land, as do the animals we love and rely on for sustenance. It is our responsibility to take care of our land so that it remains clean and healthy. How do you take care of the land around you?

How can I keep the land around my home clean?

How can businesses keep the land clean?

What are the things that threaten our land?

How does poor care for our land affect the plants and the animals of our earth?
