

Proving Triangles Congruent – Using more than one-Congruent Triangle

- 1) Separate and redraw  $\triangle ACD$  and  $\triangle BCD$ . Identify the common side or angle.

- 2) Separate and redraw  $\triangle ABD$  and  $\triangle ACD$ . Identify the common side or angle.

Write a Two-Column Proof

- Given  $\angle ZWY \cong \angle YXW$ ,  $\angle ZWY \cong \angle YXW$   
 Prove  $\overline{WZ} \cong \overline{WX}$
