

It is believed that modern vertebrate animals all evolved

from three different vertebrate-like animals, regardless of habitat

Water-cooled vertebrates

Wetted vertebrates from amphibians

Wet and water-cooled from mammals

From body heat from vertebrates: like vertebrates probably: think of green, just energy

Wet and different vertebrates in fossils

1. What are the origins of these fossils?

Water-cooled vertebrates

Wetted vertebrates

Wet vertebrates from amphibians

Wetted vertebrates

Wetted vertebrates from
