

Add Fractions With Like Denominators (A)

These fractions
have the same
denominators.

$$\frac{2}{5} + \frac{1}{5} = \frac{3}{5}$$

Add the
numerators.
Keep the same
denominator.

$$\frac{2}{4} + \frac{1}{4} =$$

$$\frac{3}{7} + \frac{3}{7} =$$

$$\frac{4}{12} + \frac{3}{12} =$$

$$\frac{2}{9} + \frac{3}{9} =$$

$$\frac{1}{10} + \frac{2}{10} =$$

$$\frac{2}{5} + \frac{2}{5} =$$

$$\frac{7}{9} + \frac{1}{9} =$$

$$\frac{2}{10} + \frac{5}{10} =$$

$$\frac{3}{10} + \frac{4}{10} =$$

$$\frac{1}{5} + \frac{3}{5} =$$

$$\frac{4}{9} + \frac{1}{9} =$$

$$\frac{3}{6} + \frac{2}{6} =$$

$$\frac{1}{7} + \frac{1}{7} =$$

$$\frac{3}{10} + \frac{4}{10} =$$

$$\frac{4}{8} + \frac{3}{8} =$$

$$\frac{1}{5} + \frac{2}{5} =$$

$$\frac{4}{9} + \frac{4}{9} =$$

$$\frac{4}{6} + \frac{1}{6} =$$

$$\frac{7}{12} + \frac{4}{12} =$$

$$\frac{1}{8} + \frac{6}{8} =$$

$$\frac{2}{9} + \frac{3}{9} =$$

$$\frac{7}{9} + \frac{1}{9} =$$

$$\frac{1}{12} + \frac{4}{12} =$$

$$\frac{4}{8} + \frac{3}{8} =$$
