Grade 6 CURRICULUM INVENTORY WORKSHEET

Indiana's Academic Standards are the foundation of what every student in the state must learn. Our local curriculum goes beyond the state standards in many instances. Textbooks, local materials, and these resources are tools to help you ensure that all students achieve the goals of our diocesan core curriculum guide and the state standards.

This inventory worksheet provides an easy way to review the curriculum. Evaluating how your current lessons and assessments cover the skills and indicators of our curriculum guide is an effective way of identifying gaps in instruction. These gaps can be addressed through the activities, assessments, and additional materials provided in the Curriculum Frameworks furnished by the State of Indiana
