

Combining Like Terms "Dot" Game

Rules: Players take turns connecting adjacent dots with a line. If a player's line closes a box, he or she chooses in the box, adds the terms in the box to his or her score, and takes another turn. The other player keeps going until his or her line does not close a box. In the end, the player with the highest total amount of terms wins. Note: Each player must take their turn (no passing), and each player must add the terms in every box he or she closes to his or her score. Keep playing until all the boxes are checked in. Some boxes have already been drawn in for you.
