Reading

Chapter 1: Section 1 pg. 2-5

Appendix B: pg. 864-866, pg. 873, pg.876-877

Define the following two terms in your own words. Do NOT copy the definitions from the glossary or the text!

1. basic research

2. applied research

3. List the six major branches of chemistry.

4. Give one specific example of each type of research which is not from the textbook.

5. In this class, reading assignments, homework and worksheets are typically given before the material is discussed in class. What are the benefits of arranging the class in this way?

6. Because you are required to answer **PLEDGED** questions over material we have not yet covered in class, you may have some questions over the material. When are those questions answered?
