

Final Exam

The ozone layer is a layer of air high above us called the stratosphere. This layer contains ozone molecules which made up of three atoms of oxygen. The ozone layer is very important to all living things because it blocks many of the sun's harmful ultraviolet (UV) rays. Without this layer, the sun

could harm us. UV rays can cause skin cancer and other problems. The ozone layer is being damaged by chemicals that we use every day. These chemicals are called CFCs. CFCs are used in many products like aerosol cans, air conditioners, and refrigerators. CFCs are being released into the atmosphere and are breaking the ozone layer. We need to find ways to stop this from happening. There are many things we can do to help protect the ozone layer.

UV rays can go through water and land so getting small water reservoirs, swimming pools, hot tubs, and spas is a good idea. Also, wearing sunglasses and hats can help. If the ozone layer is being damaged, there could be more skin cancer, cataracts, and other health problems. We need to take action to protect the ozone layer.

Reading comprehension:

1. What does the text say?

- The ozone layer is a layer of air high above us called the stratosphere.
- The ozone layer is very important to all living things because it blocks many of the sun's harmful ultraviolet (UV) rays.
- CFCs are used in many products like aerosol cans, air conditioners, and refrigerators.
- UV rays can go through water and land so getting small water reservoirs, swimming pools, hot tubs, and spas is a good idea.

2. What do the underlined words mean?

- Very important: []
- Very harmful: []
- Very dangerous: []

3. Complete the table about the ozone layer.

What is it?	What does it do?	Why is it important?
-------------	------------------	----------------------

4. Answer these questions according to the text above.

- Is the ozone layer necessary for life?
- What are some examples of the ozone layer?

Meaning of language

1. What do the underlined words mean?

- Very important: []
- Very harmful: []
- Very dangerous: []

2. Complete the table about the ozone layer.

- What does the ozone layer do for us?
- What are some examples of the ozone layer?
- What are some examples of the ozone layer?

3. Complete the table about the ozone layer.

- What is the ozone layer?
- What are some examples of the ozone layer?

4. What are the examples of the underlined words in the text above? (1, 2, 3, 4, 5, 6, 7, 8, 9, 10)

There are other things to do to help protect the ozone layer. We can use products that don't contain CFCs.

Writing exercises: write a

- short story about the environment. What can I do to help?

GOOD WORK!
