

3. Compounds that are produced by a chemical reaction	R H G H A U J T E Y R P
4. The structure that results when atoms are joined together. The smallest unit of most compounds.	D R Z A A G A P R O G S
5. Long chains of monomers linked together with covalent bonds	C F J C Y U I O S Y P O
7. A substance formed by the chemical combination of two or more elements.	N J I N K X I N M M J O
9. Compounds made of carbon, hydrogen and oxygen. Our main source of energy.	T S M K J U L M A C T F
10. A measurement system to measure the concentration of H ⁺ ions in a solution.	S S D V L E R J E L Q R
11. A mixture where all the components are evenly distributed.	H D B G O T U S E W N A
13. Elements or compounds that go into the chemical reaction (the beginning materials)	U D U O L B Z G U U X C
15. Macromolecule that stores and transmits genetic information (DNA and RNA)	S X X Z G S D L D R K L
	Z F U E L S A K H I R R
	A S T T F G L Y U F E K
	Y P X R Z M I R O P F Q
	Z A T U J J A X Q Z G H
	N H T U Y A U I V C U J
	O G L Z T H H R J Y A T
