

Page 1 of 10

Master the following descriptions with the corresponding

- 10. A. A. These quadrilaterals have three flat faces and four vertices (a long rectangle by itself)
- 11. A. A. These quadrilaterals are long triangles. Two sides are equal, two legs are long and slanted.
- 12. A. A. These quadrilaterals have no equal sides or angles, two legs are long, two legs are short, flat
- 13. A. A. These quadrilaterals are wide, two long, slanted sides, two short, flat sides, four vertices and
- 14. A. A. These quadrilaterals have two flat sides, two legs are short, two legs are long, flat
- 15. A. A. These quadrilaterals have three flat sides, two legs are long, two legs are short
- 16. A. A. These quadrilaterals have two flat sides, two legs are short, two legs are long, flat
- 17. A. A. These quadrilaterals have two flat sides, two legs are long, two legs are short, flat
- 18. A. A. These quadrilaterals have two flat sides, two legs are long, two legs are short, flat

Page 2 of 10

Master the following descriptions with the corresponding

- 19. A. A. These quadrilaterals have three flat faces and four vertices (a long rectangle by itself)
- 20. A. A. These quadrilaterals are long triangles. Two sides are equal, two legs are long and slanted.
- 21. A. A. These quadrilaterals have no equal sides or angles, two legs are long, two legs are short, flat
- 22. A. A. These quadrilaterals are wide, two long, slanted sides, two short, flat sides, four vertices and
- 23. A. A. These quadrilaterals have two flat sides, two legs are short, two legs are long, flat
- 24. A. A. These quadrilaterals have three flat sides, two legs are long, two legs are short
- 25. A. A. These quadrilaterals have two flat sides, two legs are short, two legs are long, flat
- 26. A. A. These quadrilaterals have two flat sides, two legs are long, two legs are short, flat
- 27. A. A. These quadrilaterals have two flat sides, two legs are long, two legs are short, flat
- 28. A. A. These quadrilaterals have two flat sides, two legs are long, two legs are short, flat

Page 3 of 10

Master the following descriptions with the corresponding

- 29. A. A. These quadrilaterals have three flat faces and four vertices (a long rectangle by itself)
- 30. A. A. These quadrilaterals are long triangles. Two sides are equal, two legs are long and slanted.
- 31. A. A. These quadrilaterals have no equal sides or angles, two legs are long, two legs are short, flat
- 32. A. A. These quadrilaterals are wide, two long, slanted sides, two short, flat sides, four vertices and
- 33. A. A. These quadrilaterals have two flat sides, two legs are short, two legs are long, flat
- 34. A. A. These quadrilaterals have three flat sides, two legs are long, two legs are short
- 35. A. A. These quadrilaterals have two flat sides, two legs are short, two legs are long, flat
- 36. A. A. These quadrilaterals have two flat sides, two legs are long, two legs are short, flat
- 37. A. A. These quadrilaterals have two flat sides, two legs are long, two legs are short, flat
- 38. A. A. These quadrilaterals have two flat sides, two legs are long, two legs are short, flat
