

Adding Doubles + 1

Write three steps to solve doubles plus one problems:

1. Circle the smallest digit in the problem.
2. Double the smallest number.
3. Add 1 to the answer.

Example: $4 + 5 = \underline{\quad}$

1. Circle the smallest digit: $4 + 5 = \underline{\quad}$
2. Double the smallest number: $4 + 4 = \underline{8}$
3. Add 1 to the answer: $8 + 1 = 9$

$5 + 6 = \underline{\quad}$	$8 + 9 = \underline{\quad}$	$4 + 3 = \underline{\quad}$
$6 + 7 = \underline{\quad}$	$7 + 8 = \underline{\quad}$	$3 + 2 = \underline{\quad}$
$7 + 8 = \underline{\quad}$	$6 + 7 = \underline{\quad}$	$9 + 8 = \underline{\quad}$
$5 + 6 = \underline{\quad}$	$6 + 5 = \underline{\quad}$	$2 + 3 = \underline{\quad}$
