Assessments  
10-1-1

**10-1-1: Explain the relationship between the structure and function of a cell.**

**Objective:** Explain the relationship between the structure and function of a cell.

**Learning Objectives:** Explain the relationship between the structure and function of a cell.

**Assessments:** Explain the relationship between the structure and function of a cell.

**10-1-2: Explain the relationship between the structure and function of a cell.**

**Objective:** Explain the relationship between the structure and function of a cell.

**Learning Objectives:** Explain the relationship between the structure and function of a cell.

**Assessments:** Explain the relationship between the structure and function of a cell.

**Objective:** Explain the relationship between the structure and function of a cell.

**Assessments:** Explain the relationship between the structure and function of a cell.

**Assessments:** Explain the relationship between the structure and function of a cell.

**10-1-3: Explain the relationship between the structure and function of a cell.**

(a) Explain the relationship between the structure and function of a cell.

(b) Explain the relationship between the structure and function of a cell.

(c) Explain the relationship between the structure and function of a cell.

(d) Explain the relationship between the structure and function of a cell.

(e) Explain the relationship between the structure and function of a cell.

(f) Explain the relationship between the structure and function of a cell.

**10-1-4: Explain the relationship between the structure and function of a cell.**

(a) Explain the relationship between the structure and function of a cell.

(b) Explain the relationship between the structure and function of a cell.

(c) Explain the relationship between the structure and function of a cell.

**Objective:** Explain the relationship between the structure and function of a cell.

**Assessments:** Explain the relationship between the structure and function of a cell.

**Assessments:** Explain the relationship between the structure and function of a cell.
