### Our Natural Resources

Directions: Match each type of natural resources to its proper category.

resources formed in the Earth's crust from plant and animal matter over many years	biotic resources
resources that replaced by nature and can be used over and over	mineral resources
resources that hold different metals and chemicals	renewable resources
ivers, oceans, glaciers, lakes	nonrenewable resources
resources that cannot be replaced, or will take millions of years to replace	water resources
forests, wildlife, crops	fossil fuels

Directions: Think about how climate change will affect these natural resources.
