

GCISD Lesson Plan - Monday

Date	Class
3/19/2012	8th Grade On-Level Science

State Standards:

TEKS	Student Expectation
8.11 Organisms & Environments	The student knows that interdependence occurs among living systems and the environment and that human activities can affect these systems.
(A)	describe producer/consumer, predator/prey, and parasite/host relationships as they occur in food webs within the marine, freshwater and terrestrial ecosystems.
(B)	investigate how organisms and populations in an ecosystem depend on and may compete for biotic and abiotic factors such as quantity of light, water, range of temperatures, or soil composition.

Learning

Objective:

I can	define key vocabulary terms for Ecology.
--------------	--

Language

Objective:

I can	write using newly acquired vocabulary about Ecology.
--------------	--

Lesson

Progression

Warm Up	Planners
Sequence of Learning	Frayer Model Vocabulary Words: Producer, Consumer, Predator, Prey, Parasite, Host, Biotic and Abiotic.
Check for Understanding	Double Bubble Parasite/Host
Homework	Finish Frayer Models:-)!
