

## Education at home

About 4000 families (1) \_\_\_\_\_ their children at home, and they (2) \_\_\_\_\_ very (3) \_\_\_\_\_ . One example is the Tanner family from Hertfordshire. Eve Tanner, 27, and her 29-year-old husband James (4) \_\_\_\_\_ their children to school. The Tanner children, six-year-old Stephen and eight-year-old Isom, study at home with their mother. They (5) \_\_\_\_\_ a bright, comfortable study in their home. All around there are (6) \_\_\_\_\_ books and the children's paintings are on the wall. James says, "Both Eve and I think we (7) \_\_\_\_\_ , nothing from school – only a diploma. We (8) \_\_\_\_\_ neither at all; in fact, everything we (9) \_\_\_\_\_ ."

Some parents who are teaching their children at home have a study programme, but the Tanners don't. Eve says, "The children love books. They read all sorts of things. And, of course, we read story books together. I teach them writing and mathematics, too. They write shopping lists for me. Then they go (10) \_\_\_\_\_ shopping with me and pay for the things we buy."

Eve and James take their children to the library, to museums, to concerts, to swimming pools and to cinemas. They think these activities are very important. What (11) \_\_\_\_\_ friends (12) \_\_\_\_\_ ? Eve says, "Most of (13) \_\_\_\_\_ are very (14) \_\_\_\_\_ . Some friends (15) \_\_\_\_\_ about teaching their children at home."
