

Animal Kingdom

Creatures within the Animal Kingdom can be divided into two main categories; vertebrates and invertebrates. From there, each category can be further divided to smaller, more specific categories. Your task is to define each category and find out what characteristics allow creatures into that category.

Vertebrates

1. What is the definition of a vertebrate?

Mammals

1. What are the characteristics of a mammal?

2. Give an example of a mammal.

Reptiles

1. What are the characteristics of a reptile?

2. Give an example of a reptile.
