4. PREPARED BY							
a. LAST NAME Schlep			b. RANK 2LT	c. POSITION Field Expedient Footstool			
5. SUBTASK	6. HAZARDS	7. INITIAL RISK LEVEL	8. CONTROLS	9. RESIDUAL RISK LEVEL	10. HOW TO IMPLEMENT	11. HOW TO SUPERVISE (WHO)	12. WAS CONTROL EFFECTIVE?
Operations in a Cold Weather Environment	Slipping on ice and totally eating it in front of soldiers	M	Separate outdoors hours for officers/NCOs and lower enlisted. No lower enlisted will be allowed outside for the duration of odd-numbered hours (ex. 0700, 2100, etc.) The final 15 minutes of EVERY hour will be strictly reserved for officers O-5 and above.	L	Leadership will ensure soldiers stay inside during even-numbered hours.	1SG Platoon Leadership	
	Improper wear of ECWCS (Extended Cold Weather Clothing System)	M	All personnel consult the ECWCS codex to ensure they are wearing the correct daily combination of cold weather gear.	L	S-2 will ensure ECWCS codex is reset each week and distributed to companies	S-2	
	Deep Snow Penetration		Soldiers observe proper ECWCS combination of the day and will seek medical attention if DSP or cold weather injury appears imminent.	L	Leaders will teach/coach/mentor soldiers in getting dressed and monitor temperature throughout day.	Platoon Leadership	
	Cold Weather Injury		2 medics w/FLA on site for all outdoor movement exceeding 200m or 30 minutes.	L	Soldiers conducting 200m/30 minute movement will submit CRM Worksheet to certify control measures and presence of medics	Medical PL	
	Night Poops	M	All poops are conducted during daytime under supervision of NCO E-6 or above.	L	Safety brief before poops, NCOs supervise and ensure activity falls within regulation.	NCOs, first line leaders	
	Mass Illness	M	50 soldiers will not be housed in the same room after spending the day in temperatures below 10 degrees Fahrenheit, then practice terrible personal hygiene.	L	Leaders will ensure nobody attempts training exercises longer than five days in winter months.	BN Leadership	
	TOC Craziest	H	No personnel are permitted to spend more than 50% of their week in the TOC. All TOC personnel will remember that they did not always live in the TOC, and that they talked to girls before.	M	Senior staff will ensure subordinates take regular breaks but do not converse with each other, because after this long, every possible fucking topic of conversation has been exhausted. <u>Absolutely no talking about working in TOC.</u>	XO, S-3	
	Soldiers successfully shoot, move, and communicate	M	Reduce training time by increasing safety procedures, awareness training, prevention training, and resilience training.	L	Range Safety Officers are now required to be two Range Safety Officers. Leadership will ensure soldiers complete online certificate course to qualify them to receive safety briefs.	All leaders and OICs/RSOs	
	Snow Beetles	M	Barracks OIC/NCOIC place snow beetle traps at key avenues of approach to barracks. Soldiers on fire guard blow beetle whistle once every five minutes.	L	PCC/PCI fire guard for presence and serviceability of beetle whistle. Snow beetle traps checked regularly by certified officer/NCO. Soldiers briefed to notify CoC, medics, and range control immediately if "emperor" snow beetle sighted.	Barracks OICs/NCOICs
