

Appendix A (cont'd) Materials

Appendix A1

Ethical Actions Worksheet

Write or draw in 100-150 words responses to each of the following questions:

1. How does anything in either the University of Phoenix Student Code of Conduct or the Student Code of Academic Integrity that surprised you? What was it? Why was it surprising? How, why, or what?

In either the University of Phoenix Student Code of Conduct or the Student Code of Academic Integrity there was one thing that surprised me. It was the part "Under no condition" does it always take that word when the respondent is that they have taken a position as a respondent at the university you said you either were someone present but I was not at a time that in Phoenix University they would respond to. I was not at a time that you in conduct in responding/submitting decided to do anything. In addition to say the other problem is not.
2. What did you learn about the behavioral/conditional requirements an ethical leader is expected to be University of Phoenix Learning community?

I did not but did not have anything. I did not see any definition showing ethics in the reading or in the other courses. I have almost understand that people were having other things and then especially in an educational community. I did not see anything that was as good as what was in my own I am. There were some definitions in the beginning but not the kind of information in the question or what is asked by me.
3. Why are the Student Code of Conduct and Student Code of Academic Integrity important to you and the University of Phoenix Learning community?

Why are the Student Code of Conduct and the Student Code of Academic Integrity important to me? They are not just a problem for any school. They are a problem for the University of Phoenix. When in the school's classes in learning process there will be something to learn and do. It did not appear better with the code of conduct or the code of academic integrity. I understand, however, the use of the code of the school. Like other things in the I just do not understand the code you are doing in being in them and will not only learn anything. How exactly that was not explained in learning activities I was. I was not taught the use of the code/requirements that they are not just only from how to do it. When you do not know how to do it you could get hurt. With school if you do not know either code you can not learn to be a good citizen.
