**QUESTION**

**1. CREATION**  
**QUESTION**

Figure 1: A line drawing of a plant with a large, rounded, bulbous base and several long, thin, upright stems. The drawing is simple and schematic, showing the overall form of the plant.

**1. CREATION**  
**QUESTION**

**QUESTION**  
 The figure shows a cross-section of a plant stem. The stem is divided into several regions. The central region is labeled 'P' and is surrounded by a ring of cells labeled 'Q'. The outermost layer is labeled 'R'. The stem is shown in a cross-section, with the central part being the pith, the middle part being the cortex, and the outermost part being the epidermis.

**ANSWER**

- 1. Pith (Central part)
- 2. Cortex (Middle part)
- 3. Epidermis (Outermost part)

**EXPLANATION**

- 1. Pith (Central part)
- 2. Cortex (Middle part)
- 3. Epidermis (Outermost part)

**QUESTION**

- 1. The stem is divided into several regions. The central region is labeled 'P' and is surrounded by a ring of cells labeled 'Q'. The outermost layer is labeled 'R'. The stem is shown in a cross-section, with the central part being the pith, the middle part being the cortex, and the outermost part being the epidermis.
- 2. The stem is divided into several regions. The central region is labeled 'P' and is surrounded by a ring of cells labeled 'Q'. The outermost layer is labeled 'R'. The stem is shown in a cross-section, with the central part being the pith, the middle part being the cortex, and the outermost part being the epidermis.
- 3. The stem is divided into several regions. The central region is labeled 'P' and is surrounded by a ring of cells labeled 'Q'. The outermost layer is labeled 'R'. The stem is shown in a cross-section, with the central part being the pith, the middle part being the cortex, and the outermost part being the epidermis.

**ANSWER**

- 1. Pith (Central part)
- 2. Cortex (Middle part)
- 3. Epidermis (Outermost part)
