Budget Project Using Excel Spreadsheet

Name _____

Once you have chosen an annual salary, you will need to create a budget that accommodates your weekly income. You will divide your annual by 12 (months); this is how much you have to work with for one month.

You will need to create a monthly budget using the following categories:
(these will be your rows)

- Rent (find an actual apartment on-line and print details
  - 4Rent.com
- Phone bill
- Gas & Electric ($150.00)
- Car Payment (take the price and divide by 36 ---this is a 3 year car loan)
- Gas
- Groceries
- Eating Out
- Entertainment
- Gifts
- Clothing
- Savings (must put at least $5.00)

You must have appropriate labels for each item in the budget. You must also include:

1. Your yearly income
2. A formula displaying your monthly income (ex. 23000/12)
3. A formula displaying total expenses
4. A formula displaying what is leftover after expenses
5. Pie graph displaying only the expenses---NOT THE TOTAL!!!

Criteria:
Above budget items are all included   30
