

Worksheet involving Integers

A. Describe how you would add integers.

B. Describe how you would subtract integers.

C. What is the rule associated with multiplying and dividing integers?

Simplify

$-15 + (-3)$	$-28 + 28$	$-5 + -6 + -9$	$6 + [2 + (-3)]$
$7 - 16$	$-2 - (-8)$	$8 - (-3)$	$-19 - (-18)$
$(-68) \div (-4)$	$-6 * 5$	$(-13 + -16 + -30) * -1$	$-84 \div 4 + 40$
$(-25 \div 5) * (-19 \div 19)$	$(-3 * -30 + 1) \div 13$	$-1 + (-72) \div (-3)$	$-2 * -25 * 2 - 3$
