Please ask your system administrator about appropriate DNS server settings.

Detect DNS addresses automatically

Test

Use the following DNS server addresses

Primary server IP address:

0 . 0 . 0 . 0

Secondary server IP address:

0 . 0 . 0 . 0

Default devices internal network settings should be suitable for all purposes since Softick PPP automatically translates addresses when sends IP packets to public network.

Internal network

IP Address:

10 . 0 . 0 . 1

Network mask:

255 . 0 . 0 . 0
