

Cell Wall	Protective barrier that encloses a cell
Cell Membrane	Gelatin-like mixture that flows inside a cell
Nucleus	Package and distribute proteins
Cytoplasm	Main power source of a cell
Endoplasmic Reticulum	Where photosynthesis takes place
Golgi Bodies	Stores water and other materials
Ribosomes	Large organelle containing the cell's DNA
Mitochondria	Structure giving support to the cell
Vacuole	Makes protein
Chloroplasts	Where proteins, lipids and other materials are made
